

Connect Any Industrial Asset or Machine to Any Cloud in Minutes

What Are Belden's OT Data Solutions?

Managed OT-to-cloud connectivity

Every industrial IoT and AI project requires data from industrial assets. Belden's OT data solutions, powered by CloudRail and Belden Horizon Data Operations, provide secure, reliable, and contextualized data to these data-hungry systems. Customers around the world use Belden OT data solutions to connect their factories to the cloud.

Seamlessly integrates into web-/cloud-services and on-premise applications

DATA ACCESS

Native Industrial Data Connections + Data Normalization

DATA ANALYTICS

Edge Data Processing + Bring Your Own Analytics & Apps

DATA INTEGRATION

Native Industrial Data Connections + Data Normalization

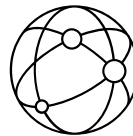

Secure, Managed & Repeatable Foundation

Connects to 275+ PLC protocols, OPC UA, industrial sensors, smart meters

Why Belden?

OT data solutions from Belden provide:

Connectivity

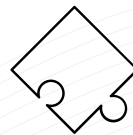

Connects both modern (greenfield) as well as legacy (brownfield) systems

Adaptability

Connect your machine to any cloud within hours instead of weeks

Scalability

Quickly start with your first machine (proof of concept) and scale it globally with less effort to any factory

Flexibility

Enables global rollouts through remote configuration and provisioning

Secure & Compliant

Is centrally managed to fulfill security and compliance requirements of enterprise customers
